June 6, 2023

The Honorable Jason Smith                                      The Honorable Richard Neal
Chair, House Ways & Means Committee                           Ranking Member, House Ways & Means Committee
United States House of Representatives                        United States House of Representatives
Washington, DC 20515                                          Washington, DC 20515

Dear Chair Smith and Ranking Member Neal:

Thank you for your ongoing leadership on expanding access to virtual care and for your commitment to considering a pathway for permanent policy around telehealth beyond the COVID-19 public health emergency. We appreciate that the Committee is bringing the Telehealth Expansion Act of 2023 (H.R. 1843/S. 1001) forward as part of these conversations and write to urge you to advance this legislation to the full House of Representatives for consideration.

In December 2022, Congress took action to ensure certain telehealth flexibilities enacted at the start of the COVID-19 pandemic were extended for two years through the end of December 2024. We applaud the Committee for ensuring this included a two-year extension of the CARES Act authority that allowed employers and health plans to provide coverage for telehealth services on a pre-deductible basis for the more than 32 million Americans with a high-deductible health plan coupled with a Health Savings Account (HDHP-HSA) through December 31, 2024.

The Telehealth Expansion Act of 2023 is a bipartisan, bicameral bill that would ensure this critical telehealth flexibility continues on a permanent basis beyond the 2024 extension. This commonsense policy has helped ensure families could access vital telehealth services – including virtual primary care and behavioral health services – prior to having to meet their deductible. In fact, according to a survey by the Employee Benefit Research Institute (EBRI), about 96 percent of employers adopted pre-deductible coverage for telehealth services as a result of this pandemic-era provision.

The ability to offer pre-deductible telehealth services for employees is a meaningful expansion of health care access and is popular among consumers. Notably, according to unpublished estimates from EBRI, over 50 percent of individuals with an HSA live in zip codes where the median income is below $75,000 annually. Over the past three years, this flexibility also enabled important expansions of access to care for individuals who may otherwise have neglected essential care due to high out-of-pocket costs. Further, a survey by NORC and AHIP found that “73 percent of commercial telehealth users said Congress should make permanent the provisions that allowed for coverage of telehealth services before paying their full deductible.”

It is imperative that Congress consider making this policy permanent to ensure that the millions of Americans with employer-sponsored coverage do not lose access to this pre-deductible coverage of telehealth services. The undersigned organizations strongly encourage you to advance the Telehealth Expansion Act of 2023 to ensure individuals with HDHP-HSAs can continue to access virtual care services on a pre-deductible, permanent basis beyond 2024.

Sincerely,
