

# RARE DISEASE CERTIFICATION FOR SPECIALTY PHARMACIES

URAC is proud to partner with Acentrus to offer special pricing for our widely respected recognition programs. Together, we can elevate your pharmacy practice.

URAC created our Rare Disease Certification specifically to build on our Specialty Pharmacy Accreditation, with only **five additional standards:**

- YOUR PROGRAM
- ASSESSMENTS
- EDUCATION AND SUPPORT
- TEAM COLLABORATION
- EVALUATION AND REVIEW

We created our Rare Disease Certification for organizations that can rise to the challenge of meeting the high level of skills an organization needed to serve patients with rare diseases. If your organization has already earned URAC's gold star for Specialty Pharmacy Accreditation, then this program could be the one to show manufacturers, providers and patients how you go above and beyond when treating patients with rare diseases.

This unique certification was developed with the input of rare disease experts, including NORD—The National Organization for Rare Disorders—to ensure the distinction reflects current and proven best practices. The certification helps better prepare your practice to respond to what manufacturers of rare disease drugs are looking for.

**The program helps highlight the work your organization already does or can help guide your practice as you build the infrastructure to support these patients.**
